TOI Student Newspaper back in schools

Delhi and Kolkata students read the print edition of TOI Student, as their favourite newspaper returned to them after 2 years

ELON MUSK \$100bn richer than Jeff Bezos

Tesla and SpaceX CEO Elon Musk is continuing to grow his status as the world's richest man, as his net worth is skyrocketing over the rest of the top earners in 2022. On the latest Forbes list, Musk increased his net worth to \$282 billion, which is over \$100 billion richer than Amazon founder Jeff Bezos, whose net worth is \$183.6 billion.

Musk was one of the biggest beneficiaries from the Covid-19 pandemic, as his net worth sat at just \$26.6 billion at the beginning of 2020. In 2020, Musk's wealth grew by over \$110 billion, which is the record for anyone in the history of Forbes tracking such numbers. The report mentioned that Musk gained another \$90 billion in 2021, as he knocked Bezos off the top of the Forbes rich list to begin the year.

Musk is now \$115 billion richer than LVMH CEO Bernard Arnault, the third-richest man in the world with a net worth of \$167.4 billion, the report said. He is also well past the numbers for Microsoft founders Bill Gates (\$134.2 billion) and Steve Ballmer (\$97 billion), it added.

Ozone may be heating Earth more than we realise: Study

Recent research has found that ozone may be weakening one of the Earth's most-important cooling mechanisms, making it a more significant greenhouse gas than previously thought. The study has revealed that changes to ozone levels in the upper and lower atmosphere were responsible for almost a third of the warming seen in ocean waters bordering Antarctica in the second half of the

20th century. The deep and rapid warming in the Southern Ocean affects its role as one of the main regions for soaking up excess heat as the planet warms. Researchers revealed that the increased ozone in the lower atmosphere caused 60 per cent of the overall ozone-induced warming seen in the Southern Ocean, far more than previously thought.

The majority of this warming was the result of ozone increases in the lower atmosphere. Ozone, one of the main components of smog, is already hazardous as a pollutant, but research shows it may also play a significant role in driving climate change in the coming years

Ozone hit the headlines in the 1980s when a hole was discovered in the ozone layer high in the atmosphere over the South Pole, due to damage caused by chlorofluorocarbons (CFCs), a gas used in industry and consumer products. The ozone layer is vital as it filters dangerous ultraviolet radiation from reaching Earth's surface. This discovery led to the Montreal Protocol, an international agreement to halt the production of CFCs.

WHAT IS THE SIGNIFICANCE OF OZONE LAYER

**LESSON
TIME**

1 Ozone is created in the upper atmosphere by the interaction between oxygen molecules and UV radiation from the sun. In the lower atmosphere, it forms due to chemical reactions between pollutants like vehicle exhaust fumes and other emissions

2 Changes in ozone concentrations in the atmosphere affect

westerly winds in the Southern Hemisphere as well as cause contrasting levels of salt and temperature close to the surface in the Southern Ocean. Both affect ocean currents in distinct

ways, thereby affecting ocean heat uptake

3 Ozone air pollution, at ground level where humans breathe, causes serious health problems

WhatsApp turns off 'media visibility' option for disappearing chats

Meta-owned WhatsApp has now turned off the option of "media visibility" for disappearing chats on WhatsApp for Android, which lets people view media in their phone's gallery. According to WABetaInfo, the new move is to ensure a better privacy experience when using disappearing messages and to help keep media more private in disappearing chat threads. In addition, the messaging platform is also rolling out the same change on WhatsApp for iOS, where the option 'Save to Camera Roll' is automatically turned off for disappearing chats. In this case, images, videos and GIFs are never automatically saved in a user's camera roll if the general setting is enabled.

TECHAWAY

■ Users can still save media manually in disappearing chats. Some users on certain versions of Android already have an option to manually save media

■ On WhatsApp for iOS, users can save media as normally users do

■ The changes are rolled out to all users on beta and public builds, and full activation to everyone may happen soon

Babar Azam overtakes Tendulkar on list of all-time ICC ODI batting rankings

Pakistan skipper Babar Azam is the man in form at the moment. The 27-year-old recently featured in the all-format series against Australia and was amongst the highest run-getters in all three formats. Now, Babar has added another feather in his cap by going past Sachin Tendulkar.

Babar has overtaken Sachin Tendulkar on the all-time ICC ODI Batting rankings list. Tendulkar, with 887 points, was placed at 15th position. Babar, who is now on 891 points, courtesy his superb show vs Australia, has replaced Sachin

ON RECORD BOOKS

West Indies great Sir Viv Richards is in the first position with 935 rating points and is followed by Pakistani legend Zaheer Abbas (931), former Australian skipper Greg Chappell (921), Englishman David Gower (919) and Australia's Dean Jones (918). Former Indian skipper Virat Kohli is in the sixth spot with 911 rating points under his belt

Mushrooms can talk to each other and recognise up to 50 words

Until date, we have heard about food robots, but did you know even plants can talk like humans and understand words? Yes, you read it right. If reports are to go by, a latest study states that mushrooms can talk to each other and recognise up to 50 words. A study of the electrical activity of four species of fungi has found that the spike clusters resemble human vocabulary of up to 50 words, with the information being passed along fungal roots called mycelium. The research states that electrical impulses are structurally similar to human speech and resemble the vocabulary of dozens of words. According to researchers, it has been found that the impulses increased when wood-digesting fungi came into contact with wood, suggesting fungi may use electrical transmissions to share information about food or injury.

■ As per the research, the average length of each 'word' was 5.97 letters, of which the English language averages 4.8 letters per word, and that it showed fungi had minds and a consciousness

■ If we go by the research, it is assumed

that spikes of electrical activity are used by fungi to communicate. It was also found in the research that the size of fungal vocabulary can be up to 50 words. However, the core vocabulary of most-frequently used words does not exceed 15 to 20 words

'RRR' crosses ₹ 1000-cr mark, 3rd desi film to do so globally

S S Rajamouli's magnum opus 'RRR' has made history. Just as it entered week three in theatres, it added yet another zero to its numbers by crossing ₹1,000-crore worldwide. The Ram Charan-Jr NTR movie has thus joined the coveted club that features 'Dangal' (₹2,024 crore) and 'Baahubali: The Conclusion' (₹1,810 crore). Interestingly, it has become the third Indian feature film to attain this feat globally.

➤ 'RRR' is a fictional story based on the lives of real-life freedom fighters Alluri Seetharama Raju and Komaram Bheem. In the film, Ram Charan portrays the role of Raju, while NTR Jr plays Bheem

➤ The film is reported to be

one of the most-expensive films made in India with a budget of over ₹ 450 crore. Produced by D V V Danayya of DVV Entertainments, it also stars Bhatt, Samuthirakani, Ajay Devgn, Ray Stevenson, Alison Doody and Olivia Morris in pivotal roles

Introducing inflation to classroom

Time for some auction action!

Teacher to auction goods to a classroom of bidders. With this activity, students will define money and inflation, and describe the relationship between the supply of money and inflation...

Materials needed

FOR THE AUCTION: You need to distribute money (Monopoly notes) to students. Distribute ₹10 to ₹10,000 monopoly notes among children. Teachers have to ensure that it is unevenly distributed so that some groups (can make 4 groups of 10 students each) get more than the other.

■ Two sets of three identical items for two auction rounds; items should be of interest to students, for example, a candy bar, a fun gadget, a stationery set.

Preparation

Divide the Monopoly money so that approximately one-third is available for auction Round 1 and two-thirds is available for auction Round 2 before you start distributing them unequally to groups

GOING ONCE, GOING TWICE, SOLD!

Photo: GETTY IMAGES

AUCTION 1

Distribute the money to students in a random fashion. Make sure that the amount of money students receive is varied to ensure that someone wins the auction rather than it ending in a tie.

Tell the students they will participate in an activity designed to help them understand the role of money in the economy. Explain the rules for the auction:

- Three items will be auctioned (by the teacher).
- The highest bidder will win each item.
- The three items represent the total output of goods and services produced in the classroom economy.
- Your group may not combine your money with anyone else's in the room.
- Show the students the three auction items.

Conduct the auction as follows:

- Invite the students to bid
- Teacher sells each item to the highest bidder, and students note the final selling price of each item. Collect the money from the winner as part of the transaction.
- Record the price of each item sold and calculate the total.

AUCTION 2

- You will distribute additional money.
- You will auction three items identical to the ones from Round 1.
- If anyone has money left over from Round 1, he or she may use that money in this round. The "new" money is equal in value to the old money.
- Distribute in random amounts approximately double the amount of money distributed in Round 1 to each group.
- Conduct the auction as before.

NOTE: Prices should be considerably higher in Round 2. If students are not bidding high prices, encourage more bidding by reminding students that this is the final auction round and that their money cannot be used to buy goods and services outside the classroom

Discussion points for teachers pre and post auction activity

BEFORE ROUND 1

1 What is money? Explain that money is anything widely accepted in exchange for goods and services. More precisely, the US currency is fiat money, which means it has no intrinsic value (no value of its own) or representational value (not representing anything of value, such as gold).

2 Why are you happy when you get money on your birthday? (Money buys goods and services.)

3 Why do employees work to receive money? (Answers will vary but will likely include that people work for money so that they can buy goods and services.)

INFLATION

Inflation is an increase in the average level of prices in the economy, not the individual prices of a few goods. For example, while the prices of gasoline and movie tickets might increase, the prices of computers and baseball tickets might decrease. Economists say inflation occurs when "too much money is chasing too few goods." This is likely to occur when the money supply increases at a faster rate than the supply of goods and services produced in the economy.

4 Why do businesses accept money for other goods or services? (Businesses accept money so that they can pay employees and buy other goods and services.)

5 Explain that money facilitates economic activity, but too much or too little money can cause problems.

6 How would your spending likely change if you had more money? (They would likely spend more money.)

7 In general, is spending good for the economy? (Yes, more spending can

lead to more production of goods and services. More production can lead to more jobs and income for people. This chain of events results in an expanding economy.)

8 If more money results in more spending, and more spending can cause economic growth, why shouldn't the government continuously add money to the economy? (Answers will vary.)

AFTER ROUND 2

1 What happened to prices in Round 2 compared with those in Round 1? (Prices were higher in Round 2.)

2 Were the goods in the auctions different in any way? (No, they were exactly the same.)

3 Were there any more items available to buy in Round 2 than in

Round 1? (No, the number of items was the same in both auctions.)

4 Why were prices higher in Round 2? (People had more money in Round 2, so they were able to bid higher amounts for the identical items than they could in Round 1.)

5 How would you summarise the relationship between the money supply and prices? (The money supply and the prices of goods and services are directly related.)

6 Explain that the increase in prices between Rounds 1 and 2 is an example of inflation. Further explain inflation as follows: Inflation is a general, sustained upward movement of prices for goods and services in an economy.

Age is no bar for living on budget

In India, financial planning is one concept that individuals and corporates took ages to conceive. Even now, studies say 89% of salaried income group do not understand or find time to sit down and do proper financial planning. While working individuals and business owners are associated with the concept of financial planning, we clearly ignore a student being able to conceive this concept at a very early stage in life. Imagine the difference an individual may

Studies say 89% of salaried income group do not understand or find time to sit down and do proper financial planning

have in his/her life if this concept is infused at a very early stage. The early stage here could be at the start of teenage years, sounds fair doesn't it?

Living on budget

The most common issue the millennials face today is debt trap and that's hugely because at schools and at col-

By Elizabeth Thomas
Chief Mentor, Tale Tellers, Training the teachers with Tale Tellers Jr, Elizabeth comes in with over 10 years work experience in training and human resource management. She also has industry experience in the banking sector.

leges the focus on money management and financial planning is missing. As parents, we need to chip in here and get our children to live on budgets. This will invariably make the child conscious about his/her spending.

Self-funding studies

The culture of parents funding educational expense is a bit old school and we need to move on to make our children consider generating income and self-funding his/her educational expense. The coolness

of telling their friends "Hey, I funded my own studies" and "I am a self-made individual" is going to be trending soon.

Bit of motivation

Yes, motivation is free on YouTube and Google, but sound and sensible financial motivation is crucial. The whole process of financial motivation is automated once they taste the freedom and understand the importance of being financially disciplined.

SCHOOL IS COOL

TUESDAY, APRIL 12, 2022

It's not just a place where you get to learn Einstein's Theory of Relativity. It's also a place where you can think beyond the classroom. Hence we say, **SCHOOL IS COOL!**

03

THERE IS SO MUCH TO EXPLORE

There's so much to explore in science,
Almost everything works because of it,
Even our electric appliance,
We can fly in the air up high,
Due to airplane,
They're also a part of science.
We do online class,
But we still complain,
At least we are able to study,
Think about those who cannot ,
And also, if it weren't for science,
There would not have been much.
Instead of complaining,
I guess we should focus,
And sometimes sing hocus-bocus.
Maybe one day due to science ,
We can fix the past won't take time.
To go to another place,
Maybe we can teleport right in front of the airport,
Who knows?
Cause science can do anything,
Even go to the sun,
Science is magical.

BHAAVYA GARG, class VII-D, Delhi Public School, Miyapur, Hyderabad

NATURE IS BEAUTIFUL

Nature is mighty, Nature is strong,
Nature is beautiful, Nature is colourful,
It is full of colours,
We should thank god for all things he gave us thank you, god,
Thank you, god, for all things you gave us.
We love you and the nature the beautiful nature,
We all love you we all love you.
There are many things in the nature,
It is all bright and colourful,
Bright and colourful, bright and colourful.
The mountains are strong, flowers are beautiful,
How good it looks, how good it looks.
We should be happy that we got all of these.
We should once again thank god,
We should once again thank God.

SHREYASI MALHOTRA, class V, Jain Heritage a Cambridge School, Kondapur

A plethora of emotions

Since the pandemic, the school has been more overwhelming than ever before. The hustle and bustle of school life was finally relieved by the students and staff. Myriad emotions were running high through the chaotic morning at home and school, which involved the rushing parents with their children in tow, the dash to the school bus, the snarls of traffic, and the sound of the school bell. There was comfort in all chaos that was sorely missed by the teachers, parents, and the children. It was a new beginning, the school wore a festive look, and the flavours of Ugadi were witnessed on the school campus. There was anxiety, joy, excitement, confusion, fights, and tears. Emotions were unmasked and school once again became that supportive, nurturing environment for the child's holistic growth. The school was abuzz with activities to stimulate their curiosity with art, craft, music, and games be-

coming a part of their routine again. Avenues for socializing and making new acquaintances were opened up and the school became that invested place of learning. Little did we know that this was the much-required booster dose we all had been waiting for.

Indu Harikumar, Pre Primary Coordinator, Gitanjali Devshala School

An informative trip to NIN

Stalls on Satellites & Spacecrafts, Balanced Diet, Diseases & DNA Educate Visitors

Students of classes IX and X of Sri Gurudatta High School visited the National Institute of Nutrition (NIN), ICMR, Tarana and took part in the event conducted in connection with Azadi Ka Amrit Mahotsav and commemoration of Science Day.

The students were guided by volunteer Ruthika and staff on the exciting tour. They entered a space van which displayed models of Chandrayaan-I Mission, Mangalyaan, satellites GLSV, RLVTD and other space crafts and mis-

Prakarsha Kondour, class X, Sri Gurudatta High School Hyderabad

siles. Children were given pamphlets on balanced diet, Functions of Food, Goodness of Greens, deficiency diseases like anemia, etc.

They visited stalls which exhibited portraits of leading scientists and their achievements, contributions and awards. There were informative stalls on benefits of having a balanced diet,

DNA, etc., and interesting activities like Learn and Win. Students eagerly took part in the interactive sessions and won some prizes like chocolates as they came to know about NIN (102 years for NIN), BMI, mysteries behind street magic, etc.

A seminar on cybernetics drew the children's interest. They also came to know all about X-ray and its mechanisms. Finally, they were given healthy refreshments, before going back to school after the informative and educative trip.

A Life of Dedication & Simplicity

Inspiration is the process of being mentally stimulated to do or feel something, especially something creative'. We are all inspired by different things and in different ways. When you are inspired, you are stimulated to do or feel something. An inspired person often feels compelled to be different and do better than they currently are doing.

I am greatly inspired by Dr. APJ Abdul Kalam. He was a scientist and a great teacher known as the 'missile man of India'. From a newspaper boy, he became the 11th President of India. His simplicity and determination to serve India as a scientist is inspiring.

Abdul Kalam was born on October 15, 1931 in Rameswaram. His birthday is now observed as World Students' Day. He was the youngest of five siblings and, to help his father, he worked as a newspaper boy. He was not a bright student, but with dedication and hard work he went on to become a renowned scientist.

With a degree in aeronautical engineering from the Madras Institute of Technology (MIT), he joined the Defence

Research and Development Organisation (DRDO) and later joined the Indian space research organisation (ISRO).

He made India one of the superpowers by his contributions in the field of nuclear power. He always found time to interact with children and motivated them to dream and work hard. He was awarded Padma Bhushan in 1981, Padma Vibhushan in 1990 and in 1997,

DR APJ ABDUL KALAM

INSPIRING ICONS

he became the second scientist after CV Raman to receive the Bharat Ratna. His simplicity, hard work and love for the nation inspires me. His teachings have always motivated me to dream and work hard without thinking of the results.

NIRANJAN G. Pillai, class X, Sadhu Vaswani International School, Moshi, Pune

EKA PADA RAJAKAPOTASANA

Have you ever seen a mermaid in reality? Then, you're on the right place! Take a look here! Mermaid pose is another name for Eka Pada Rajakapotasana. It is one of the many ancient hatha yoga pose. Mermaid Pose is a special asana that allows one to both "squeeze into" and "open out" to life. It also helps us to experience serenity and to become as flexible as a rubber band.

Preparatory poses:

- Pigeon Pose
- Leg stretching pose

Steps to follow:

- Begin in Pigeon pose with your right

leg forward.

- Bend your back knee (the left side in this case) and grab your left foot with your left hand.

- Slide your foot into the crook of your left elbow. You can stop here or progress to the next step.

- Reach your right arm straight up toward the ceiling. Bend your elbow, drop your right hand behind your head.

- Bring your hands to meet. Press the back of your head into your right arm.

- Try not to fall over onto the right side of your hip. Keep your chest pointing toward the front of your mat.

- Release your foot, slowly lower your leg with control, and repeat the pose with the left knee forward.

Precautions:

- Avoid doing this pose if you have any hip, shoulder, hand, knee and ankle pain.

Benefits:

- This pose stretches hips, groin, shoulders and quads
- This pose will also open up your legs, heart and hips

MAHIMA ZADE, class IX, Elegant Blue Ridge Public School, Pune

Yoga should be practiced under the supervision of Yoga Guru. The views expressed in the above article are those of the author and the newspaper takes no responsibility for it.

TRADITIONS, CULTURES AND FESTIVE VIBES

Niraj Public School

Niraj Public School recently celebrated Ram Navami, the birth anniversary of Lord Rama. The function commenced with the lighting of the lamp, followed by a pooja performed by Principal B Jivitesh Reddy, along with the chanting of mantras by the school choir.

Melodic spiritual bhajans were sung by students and teachers with religious fervour. The school wore a festive look as students and teachers were dressed in traditional outfits, making the premises colourful and vibrant. HOD Hindi Om Prakash Purohit said the festival, which falls on the ninth

day of the Chaitra month, indicates the removal of the bad and the entrance of divine power. He also shared many incidents with the students depicting various phas-

es of Lord Rama's life. The atmosphere was filled with the spirit of devotion and love for Lord Rama, with a beautiful dance performance by the students at the end.

As part of the Ugadi Celebrations, a colourful dance program was organised by the Bangaru Telangana Folk Arts Academy on April 1 at the Santinos Global School. The students of Santinos Global School participated in the solo and group performances of Bharat-

Santinos Global School

natyam. The students were styled in traditional attires looking vibrant and energetic. The winners were felicitated with trophies, and shields, followed by certificates. This was an event to promote classical dances and understand the importance of traditional dances depicting Indian culture.

CSK NEED CONFIDENCE AGAINST RCB

TEAM'S SELF-BELIEF SHAKEN AFTER FOUR LOSSES IN A ROW

Defending champions Chennai Super Kings would need to lift themselves after a nightmarish start to the season and play a "complete" game when they take on a high-flying Royal Challengers Bangalore in the IPL on Tuesday. In words of head coach Stephen Fleming, the team's self-belief is shaken after four losses in a row.

The four-time champions haven't played the cricket they are known for under skipper Ravindra Jadeja, who has not been able to lead from the front.

Upcoming IPL Match

FIRING FINISHER

Skipper Faf Du Plessis can take any attack to cleaners and the top-three too are in good form. Dinesh Karthik is the firing finisher for RCB and engineer-turned cricketer Shabbaz Ahmed has also impressed with his batting so far.

Apart from veteran Dwayne Bravo, CSK bowlers have been way off the mark. They need to get the bowling combination right having tried many options. Another key weak-link is Mukesh Choudhary, who has been leaking runs. Unless CSK find the right combination, RCB would be expected to run away with the game. AGENCIES

NEED TO STEP UP

The seniors in the team including 'Thala' Mahendra Singh Dhoni, Robin Uthappa, Ambati Rayudu and Dwayne Bravo need to step up in this crisis situation.

The CSK batters will have to face a potent RCB bowling attack including the likes of spinner Wanindu Hasaranga, David Willey and Mohammed Siraj. Young Ruturaj Gaikwad, who has had a miserable season so far, will need to step up and deliver and also all-rounders Moeen Ali and Shivam Dube will have to take more responsibility.

CSK have only posted one 200 plus score so far while scoring sub-par totals in the other three games

TICKING ALL BOXES

Fleming admitted that the side is facing two-fold problems -- unavailability of Deepak Chahar due to injury and a below-par show in all departments.

"There have been issues of player availability and we have been pretty much below par in all departments -- batting, bowling and fielding. We have been distant second in all games and we need to improve in all departments - that's pretty much it," Fleming had said summing up his team's show. A buoyant RCB, however, are ticking all the boxes.

Opener Anuj Rawat, who hit his maiden IPL fifty, came to the party against Mumbai Indians, while Virat Kohli also got much needed runs.

VILLARREAL EYE ANOTHER GIANT KILLING

BAYERN STARS VOW TO DOWN YELLOW SUBMARINE

“We've beaten one of the best teams in the world,” said captain Dani Parejo after Villarreal secured a 1-0 victory over Bayern Munich in the first leg of the Champions League quarter-final last week. But he knows it might not be enough.

Villarreal enjoyed one of the finest nights in the club's history with a superb performance at La Ceramica that caught the six-time European champions cold. Unai Emery's side will take a one-goal lead into Tuesday's second leg in Germany, yet the overriding feeling was regret as a series of missed chances kept Bayern alive.

TACTICALLY ASTUTE

Villarreal have made a habit of neutralising glamorous opponents, even if their La Liga position of seventh shows they can struggle against modest opposition. In the past year, Villarreal have beaten the Europa League champions, the Coppa

Italia winners, the Bundesliga champions and the FA Cup winners. They also defeated Manchester United to win last season's Europa League.

In Spain, they are unbeaten this season against defending champions Atletico Madrid and leaders Real Madrid.

“We produced a tremendous performance and if we're honest we should have won by more. Villarreal midfielder, GIOVANI LO CELSO”

After the stunning 3-0 victory in Turin that knocked out Juventus in the last 16, Villarreal will believe they can complete the job in Germany and reach the club's first Champions League semi-final since 2006. Win or lose in Munich, the win against Bayern in the home leg will go down in the Villarreal history books.

RELISHING ON PRESSURE

Bayern Munich stars have vowed to knock Villarreal out of the Champions League with Leon Goretzka insisting the German giants are relishing the pressure of Tuesday's must-win home quarter-final.

While Bayern were winning a third consecutive European Cup in 1976, Villarreal were being relegated to the fourth tier in Spain. When Bayern won their fifth in 2013, Villarreal had just been promoted back to the topflight.

LOOKING FOR NEXT LEVEL

With stability secured, Emery was hired to take the team to the next level, challenge for trophies and La Liga's top four.

They have disappointed in the league, but cup success has kept Emery's stock high. He was tempted by the Newcastle job but turned it down, the prospect of a European run too tantalising. The only question now is whether the momentous win over Munich will be remembered as the pinnacle of an incredible run, or the basis for something more. AFP

AMIT ROHIDAS TO LEAD INDIA AGAINST GERMANY IN FIH PRO LEAGUE TIE

Defender Amit Rohidas will continue to lead the 22-member Indian men's hockey team in its next FIH Pro League tie against Germany, starting on Thursday.

Star drag flicker Harmanpreet Singh will don the responsibility of vice-captain in the double-header at the Kalinga Stadium. The second match of the tie will be played on Friday.

There were no big surprises in the squad as the Indian team management continues to test various combinations from the core group in the Pro League ties ahead of a busy calendar year, which includes the Birmingham Commonwealth Games and the Asian Games in Hangzhou, China. The squad includes goal-

Amit Rohidas

keepers PR Sreejesh, Krishan Bahadur Pathak, and defenders Varun Kumar, Amit Rohidas, Surender Kumar, Jugraj Singh, Harmanpreet Singh, Jarmanpreet Singh, and Gurinder Singh. PTI

QUIZ TIME!

Q1: What is the name of the ice hockey designed for players who have a physical disability?

- A Sledge Hockey
- B Bandy
- C Roller Hockey
- D Rink Hockey

Q2: When did the Indian National Field Hockey team win its first Olympic Gold?

- A 1985
- B 1928
- C 1946
- D 1956

Q3: Which athlete has won five gold medals in men's long jump?

- A Carl Lewis
- B Stefan Holm
- C Ivan Pedroso
- D Javier Sotomayor

Q4: What is the motto of Olympics?

- A Faster, Higher, Stronger
- B Together We Stand
- C Fast and High
- D Do Your Best

Q5: Varun Singh Bhati who won the Bronze at the 2016 Rio Paralympic games is associated with which sport?

- A High jump
- B Shot put
- C Javelin Throw
- D Badminton

Varun Singh Bhati

Photo: GETTY IMAGES

Q6: Who was the first player to win all four major Grand Slams in one year?

- A Bobby Riggs
- B Don Budge
- C Rod Laver
- D Fred Stolle

Q7: Who among the following players is considered the greatest Hockey players in the history of Hockey and was also offered a senior position in the German Army by Adolf Hitler?

- A Dhyan Chand
- B Lal Shah Bokhari
- C Kishan Lal
- D Jaipal Singh Munda

Q8: When was the first cricket club established in India?

- A 1890
- B 1780
- C 1792
- D 1905

Q9: Which among the following hard court?

- A French Open
- B Wimbledon
- C US open
- D Australia open

ANSWERS:

- Q1) A Sledge Hockey
- Q2) B 1928
- Q3) A Carl Lewis
- Q4) A Faster, Higher, Stronger
- Q5) A High Jump
- Q6) B Don Budge
- Q7) A Dhyan Chand
- Q8) C 1792
- Q9) D Australia open
